

FIBONACCI'S LABYRINTH

THE SHANGRI-LA OF SPIRITUAL SPACES

A place full of intricate passageways and blind alleys to immerse people in the moment of spiritual experience.

The golden ratio brings about a natural comfort that is immediately recognizable.

Mother earth has utilized this beautiful fusion of art and mathematics to create, and Fibonacci's Labyrinth follows suit.

The history of labyrinths have ties closely with meditation, as they have been used as a spiritual tool for thousands of years.

As one walks into the single line path, they ponder their discomfort and troubles.

Once reaching the center, one meditates to the kiss of daylight, and leaves their inner burdens in the center of the labyrinth as they retreat out the same path.
